

Athens, 9th of May 2007

Dear partner,

Eltrak CAT, closely following the evolution of the construction equipment market, has been aware of the growing tendency for the expanding use of small machines, among which Skid Steer Loaders have an outstanding place.

Being consistent to our objective for continuous improvement of our services, and aware of how critical the operating cost of Skid Steer Loaders is, we are pleased to include in our parts commercial programs for 2007 that of Skid Steer Loaders tires. **The program involves a 10% discount resulting in exceptionally competitive prices.**

Tires product line offers choices for any possible use of the machine, securing the least possible maintenance, great stability for the machine, exceptional protection against flats and maximum endurance against.

We would like to assure you that our efforts will always be in the direction of offering the best possible product support services, aiming to become your most dependable partner in the your attempt to secure the smooth operation of your equipment.

Sincerely yours,

H. Grammatikas
Product Support Manager

TIRES PRODUCT LINE
